FROM: CPURCELL
Subject: POST-EPA ACTIVITIES

I spoke with Chuck Lister this morning on a number of topics, including Gerard Wirz recent correspondence on POST-EPA actions and your note on the "junk science". Chuck is sending something to you and I in partial response to yours -- when you receive it, please call Chuck to discuss possibilities for overall programs directed towards EPA response activities. In particular I think we should offer to get involved in whatever Gerard is thinking before it goes too far. By now you should have received the package regarding the February confer ence. Let me know what you think. The agenda was in fact a compromise with Matt and Anne. The "war games" have become part of a "risk-communication" exercise directed bythe woman whose name I mentioned to you on our phone call Susan Santos. I think it will work out quite well. Our original plan for an opening dinner on Tuesday the 22nd has changed--we are looking into outside activities visitors may want to take part in during the conference.
